NMEA-GDGT

Description:
Modified GDGT from S*ulfolobus acidocaldarius* for investigational use only.

Sample information:

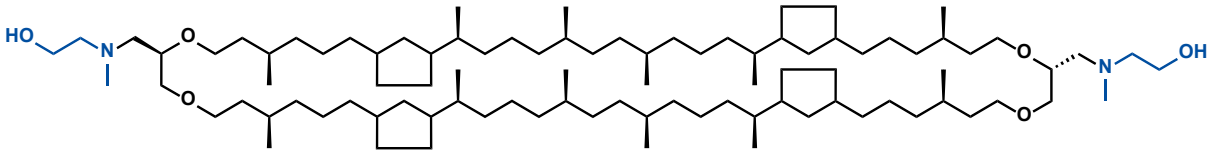
Product name	N-(methylethanol)-amine-GDGT
Cat.#	69756
Physical appearance	colorless to slightly yellow oil
Apparent pKa value	6.61
Solubility in ethanol	80 mg/mL
Solubility in *i*-propanol	80 mg/mL
Shipment	ambient temperature, packed under N_2
Storage	-20 °C

Sample composition:

Lipid component	Chemical formula	Purity[2]	Molecular mass (g/mol)
NMEA-GDGT[1]	$C_{92}H_{178}N_2O_6$	>95%	1408.44

GDGT… glycerol dialkyl glycerol tetraether

Structure:



Handling information:
Recommended solvents: dissolves in all common organic solvents (e.g. diethylether, dichloromethane, chloroform, THF, *i*-propanol, DMSO…)

The compound is stored under N_2 atmosphere.

For formulation experiments ethanol *absolute* or pure *i*-propanol are recommended as solvent. Note that traces of water, e.g. due to usage of ethanol 96%, lead to formation of a cloudy suspension.

To quantitatively dissolve the product in the original container it is recommended to thoroughly rinse the whole vial and cap with solvent.

[1] The GDGT moie ty naturally occurs with 0 to 8 cyclopentane rings, resulting in minor deviations of the molecular mass.
